Subject: FW: 1Q 2016 Domestic Well Sampling Event
1Q 2016 Domestic Well List for EPA 1-26-16.xlsx

Dave,

As Rob notes below, the 1Q 2016 Domestic well sampling event at Yerington is scheduled to begin March 7th. Please let us know if EPA plans to collect split samples during this event, and if so from which wells.

Thanks,

-jack

Subject: 1Q 2016 Domestic Well Sampling Event

Jack,

Attached for EPA's use is the Domestic Well table for the 1Q 2016 event, during which "quarterly" and "semi-annual" wells (up to 175) will be sampled. During the 3Q 2015 sampling event, Tetra Tech indicated that the EPA intends to collect split-samples during the event, which is scheduled to start at 11 AM on Monday, March 7th and last through the end of Thursday, March 10th. Please let me know if this is still correct, and if so, please request that Tetra Tech/EPA forward me a list of wells from which they intend to collect split-samples.

Some contact information has been revised (as indicated in the table) since our last e-mail to EPA on 10/26/15. Also, DW-169 has been removed from the domestic well sampling program as the house has been physically moved off of the property, the well disconnected, all sampling points removed, and the property currently is vacant. Therefore, going into the 1Q 2016 sampling event, the current totals are as follows (as of January 26, 2016):

209 wells total

180 "Yes", we have signed access agreements (although DW-69, DW-169, DW-200, TW-6, and WDW019 no longer are sampled)

3 "Pending", owner(s) have indicated that a signed access agreement will be sent

3 "Outstanding", access agreement sent but not returned, we have been unable to contact by phone and/or in person

23 "No", owner(s) not interested in program, have declined access to sample their well

I'll let you know of any revisions to this information before the 1Q 2016 event, which again will start on Monday, March 7th. Please let me know if you have any questions. Thanks!

Rob Lowry
